Georgia Republican Assembly Outraged by Second Assassination Attempt on Former President Donald J. Trump

Georgia, September 16, 2024 — The Georgia Republican Assembly (GRA) expresses its profound outrage following the recent assassination attempt on former President Donald J. Trump at the Mar-a-Lago golf course. This alarming incident marks the second time in just two months that a threat has been made against the life of our nation's leader, and it underscores the urgent need for accountability and justice.

The GRA is grateful that President Trump emerged from this harrowing experience unscathed. His safety is a relief to all who value the principles of democracy and the rule of law. We commend the quick actions of the Secret Service and local law enforcement, which ensured the former president's protection during this dangerous situation.

We call upon law enforcement agencies to swiftly identify and prosecute the assailant, as well as any co-conspirators involved in this heinous act. It is imperative that those who threaten the lives of public figures are brought to justice to prevent further violence and intimidation.

Furthermore, the GRA urges the media to temper their rhetoric regarding President Trump. The false narrative that he poses a threat to democracy, fueled by baseless allegations, creates a dangerous environment that emboldens unhinged individuals to commit acts of violence. It is crucial for the media to recognize their role in shaping public discourse and to refrain from inciting further division and hostility.

In these challenging times, we must unite in our commitment to protect our leaders and uphold the democratic values that define our great nation. The GRA stands firmly with President Trump and calls for an end to the political violence that threatens the fabric of our society.
